

Other Wall-Mounted Distribution Racks

LSA PROFIL® wall-mounted distributor rack kit

Basic kit

The LSA-PROFIL wall-mounted distributor rack kit is a unit for quick wall-mounting or mounting in 19" systems. Up to 3 profile bays can be mounted on the 500mm long C rails. Each profile bay consists of two round rods (800mm long) and 2 LSA profile rods 95, as well as jumper guides which are mounted on the upper and lower C rails. Each bay can accommodate up to 32 LSA PROFIL modules, which means that a 3-bay distributor can accommodate up to 960 pairs (gross). Banks of distributor racks can be set up, however, should be limited to two basic kits (observe jumpering volume!).

Two kits are available:

- Basic kit
- Extension kit

With the exception of the two 500mm long C profile rails in the basic kit, the two kits contain the same components and the same number of pieces per component.

Order example:

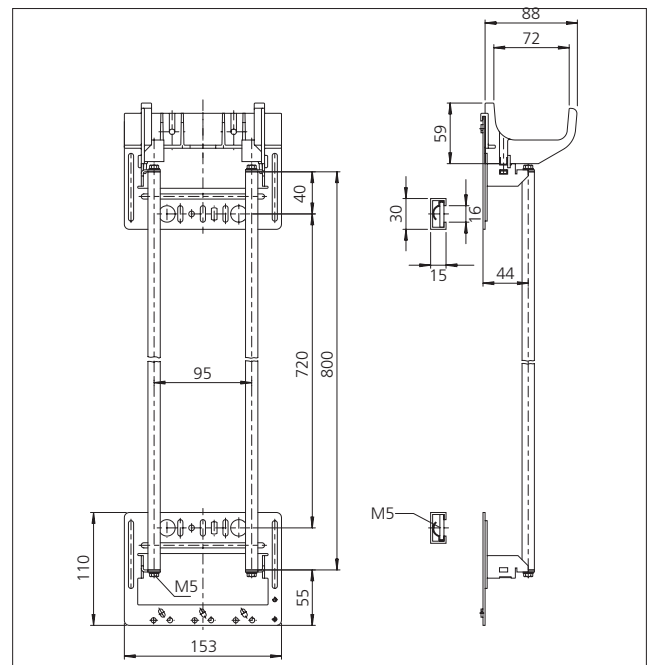

Requirement for one distributor with 3 bays:

- One basic kit 9101 1 010-00 and
- Two extension kits 9101 1 011-00

Dimensions:

Total width: 500mm

Refer to illustration for individual dimensions
